MY SHORT AI JOURNEY

Build your own Second Brain

I'm a monthly **subscriber** of ChatGPT and Claude.

I'm lucky that GitHub is still free for me right now.

Why did I feel the need for AI? Where did my journey begin?

I was dealing with a huge archive and needed a better way to manage it.

Find a quick way to do it

I have my own library. I just wanted to search for what I needed, find the right Python files, and put everything together quickly and effectively.

CLAUDE + MCP | PPT Note:

Claude's software capabilities have advanced significantly, and I regularly use it in my hobby projects. You will see examples in a future presentation, but for now, I am sharing videos. If you're interested, please take a look. There are also examples of the MCP protocol available on YouTube.

Built an MCP that lets Claude talk directly to Blender. It helps you create beautiful 3D scenes using just prompts!

Here's a demo of me creating a "low-poly dragon guarding treasure" scene in just a few sentences

Claude

Professional Plan

Good morning, ahujasid

Make a scene in Blender where there's a dragon standing next to a pot of gold. Make it isometric and make sure the lighting is playful and

Claude 3.7 Sonnet Choose style Use shift+return for new line

I'll help you organize the files in the Desktop\Test2 folder by creating folders based on file extensions and moving the files accordingly. Let me start by checking what's available and examining the contents of that folder.

F list_allowed_directories ▾

F list_directory ▾

Perfect! I can see the Test2 folder contains files with different extensions: .png, .gif, and .mp4. Now I'll create the corresponding folders and move the files into them.

First, let me create the folders for each file type:

F create_directory

F create_directory

Now I'll move each file to its corresponding folder:

Moving PNG files:

F move_file ▾

F move_file ▾

F move_file ▾

F move_file ▾

Moving GIF files:

F move_file ▾

F move_file ▾

Moving MP4 files:

F move_file ▾

F move_file ▾

F move_file ▾

Let me verify the final organization by checking the directory structure:

F directory_tree ▾
